("Proponents, Caretakers, and the Dynamics of Administrative Leadership Turnover in U.S. Executive Agencies")

Authors: George A. Krause and Jason S. Byers

Hold-over Appointees via Krause and O'Connell (2016, 2019): Right-Censored Observations [N = 29]: If an appointee to a non-fixed term position (e.g., most executive agency positions, such as Administrator of the EPA) in a previous administration serves past August 1 in the first year of a new administration, that appointee should be treated as effectively having been nominated by the new President and an additional row should be created for that person. If an appointee to a fixed term position (e.g. all positions in independent regulatory commissions) serves more than 193 dates beyond the end of their term and has not been renominated (e.g., instead was named as a recess appointee or simply stayed on more than 193 days past the end of term), that appointee should also be treated as effectively having been nominated by the President serving on the 193rd day and an additional row should be created for that person. For hold-overs in non-fixed term positions, the inauguration date of the new President should be the nomination and start date. For hold-overs in fixed term positions, the scheduled end of term date should be the nomination and start date. All variables coded at the time of nomination would therefore be coded at the time of the inauguration or end of term date.

1. **Observation Identifier**

 - vii. 4 = if nominated in seventh calendar year of administration
 - viii. 4 = if nominated in eighth calendar year of administration
- b. Obtained from Krause and O’Connell (2016, 2019)
- c. Obtained November 14, 2018

13. Confirmed

- a. *confirm*
- b. Specify date of confirmation as mm/dd/yyyy
- c. If unknown, leave blank
- d. Obtained from Krause and O’Connell (2016, 2019)
- e. Obtained November 14, 2018

14. Start

- a. *start*
- b. Start date
- c. Specify date of beginning of service in confirmed post as mm/dd/yyyy
- d. If unknown, leave blank
- e. Obtained from Krause and O’Connell (2016, 2019)
- f. Obtained November 14, 2018

15. End

- a. *end*
- b. End date
- c. Specify date of end of service in confirmed post as mm/dd/yyyy.
- d. If still serving, list as 9999
- e. If unknown, leave blank

- f. Obtained from Krause and O'Connell (2016, 2019)
 - g. Obtained November 14, 2018
- 16. End (Final)**
- a. *endfin*
 - b. Final End Date of Service
 - c. Specify final end date of service in specific position as mm/dd/yyyy.
 - d. If unknown, leave blank

 - c. 0 = if nominated under different president
 - d. Obtained from Krause and O'Connell (2016, 2019)
 - e. Obtained November 14, 2018
- 23. Bush 41**
- a. *bush41*
 - b. 1 = if nominated between 1989 and 1992
 - c. 0 = if nominated under different president
 - d. Obtained from Krause and O'Connell (2016, 2019)
 - e. Obtained November 14, 2018
- 24. Clinton**
- a. *clinton*
 - b. 1 = if nominated between 1993 and 2000
 - c. 0 = if nominated under different president
 - d. Obtained from Krause and O'Connell (2016, 2019)
 - e. Obtained November 14, 2018
- 25. Bush 43**
- a. *bush43*
 - b. 1 = if nominated after (but not including) 2000
 - c. 0 = if nominated under different president
 - d. Obtained from Krause and O'Connell (2016, 2019)
 - e. Obtained November 14, 2018
- 26. Top Level2**
- a. *toplevel2*
 - b. Classify heads and top officials for both executive branch agencies and subagencies within Cabinet Departments coded as "1" (e.g., Cabinet Secretaries; Bureau Heads), otherwise coded as "0".
 - c. Obtained from Krause and O'Connell (2016, 2019)
 - d. This data was obtained November 14, 2018
- 27. Nomination Spans More than One Congress**
- a. *nomspancongress*
 - b. This variable measures whether a nomination spans over more than one Congress.
 - c. This variable was created by the authors.

28. Decision Maker Independence

- a. *agencyind*
- b. This measure corresponds to the decision-making independence of the corresponding agency position that the nominee was nominated for based on the 1st dimension score of the Selin (2015) agency insulation measure.
- c. This data was obtained from Jennifer Selin's website (<http://faculty.missouri.edu/selinj/data.shtml>).
- d. Obtained from Krause and O'Connell (2016, 2019)
- e. This data was obtained November 14, 2018

- a. *presideal*
- b. This is the ideal point of the president. For each Congress, the president has a NOMINTE score calculated, which was used as the ideal point. This measure is calculated for each nominee.
- c. This data was obtained from Jeff Lewis' website (<https://voteview.com/>).
- d. The data was obtained on October 14, 2020.

31. Presidential Approval at Nomination

- a. *presappnom*
- b. This variable corresponds to the measure of presidential approval that occurred at the time of the nomination. If the nomination occurred on a date where a measure of approval did not exist, then the closest previous measure of presidential approval was utilized.
- c. This data was obtained from the Gallup website (<https://news.gallup.com/interactives/185273/presidential-job-approval-center.aspx>).
- d. This data was obtained on March 14, 2019.

32. Presidential Approval at Start

- a. *presappstart*
- b. This variable corresponds to the measure of presidential approval that occurred at the start date of the **position service/employment** (i.e., when the nominee started their position). If the start date occurred on a date where a measure of approval did not exist, then the closest previous measure of presidential approval was utilized.
- c. This data was obtained from the Gallup website (<https://news.gallup.com/interactives/185273/presidential-job-approval-center.aspx>).
- d. This data was obtained on March 14, 2019.

33. Administration Quarter of Nomination

- a. *adminqtr*
- b. This variable corresponds to the quarter the nomination was received.
- c. These variables were obtained from Krause and O'Connell (2016, 2019).

d. This data was obtained November 14, 2018.

34. Administration Year of Nomination

a. *adminyear*

b. = 1 if Nomination Corresponds to 1st presidential administration year,
= 2 if Nomination Corresponds to 2nd presidential administration year,
= 3 if Nomination Corresponds to 3rd presidential administration year
= 4 if Nomination Corresponds to 4th presidential administration year=
= 5 if Nomination Corresponds to 5th presidential administration year,
= 6 if Nomination Corresponds to 6th presidential administration year,
= 7 if Nomination Corresponds to 7th presidential administration year
= 8 if Nomination Corresponds to 8th presidential administration year

c. These variables were obtained from Krause and O’Connell (2016, 2019).

d. This data was obtained November 14, 2018.

35. Presidential Approval

a. *approval*

b. This variable corresponds to the measure of presidential approval that occurred at the time of the nomination. If the nomination occurred on a date where a measure of approval did not exist, then the closest previous measure of presidential approval was utilized.

c. This data was obtained from the Gallup website

(<https://news.gallup.com/interactives/185273/presidential-job-approval-center.aspx>).

d. This data was obtained March 14, 2019.

36. Agency Ideology

a. *agencyideol*

b. The ideology of the agency is -1 for ideologically *liberal* agencies based on Bayesian 95% credibility interpretation of Clinton-Lewis agency ideology scores; = 0 for ideologically *moderate* agencies based on Bayesian 95% credibility interpretation of Clinton-Lewis agency ideology scores; and + 1 for ideologically *conservative* agencies based on Bayesian 95% credibility interpretation of Clinton-Lewis agency ideology scores (see pages 17-19 of their 2008 *Political Analysis* article. 37. Unnormalized Presidential Nominee Loyalty

a. *loyalmedian*

b. Bayesian Posterior Median Estimate of Loyalty latent trait.

c. These variables were obtained from Krause and O’Connell (2016, 2019).

d. This data was obtained November 14, 2018.

38. Managerial Competence

a. *mecompmedian*

- b. Bayesian Posterior Median Estimate of Managerial Competence latent trait.
 - c. These variables were obtained from Krause and O’Connell (2016, 2019).
 - d. This data was obtained November 14, 2018.
39. **Policy Competence**
- a. *pecompmedian*
 - b. Bayesian Posterior Median Estimate of Policy Competence latent trait.
 - c. These variables were obtained from Krause and O’Connell (2016, 2019).
 - d. This data was obtained November 14, 2018.
40. **Normalized (Z-Score) Presidential Nominee Loyalty**
- a. *zloyalmedian*
 - b. Normalized (Z-score formulation) Bayesian Posterior Median Estimate of *Loyalty* latent trait.
 - c. These variables were obtained from Krause and O’Connell (2016, 2019).
 - d. This data was obtained November 14, 2018.
41. **Normalized (Z-Score) Managerial Competence**
- a. *zmecompmedian*
 - b. Normalized (Z-score formulation) Bayesian Posterior Median Estimate of *Managerial Competence* latent trait.
 - c. These variables were obtained from Krause and O’Connell (2016, 2019).
 - d. This data was obtained November 14, 2018.
42. **Normalized (Z-Score) Policy Competence**
- a. *zpecompmedian*
 - b. Normalized (Z-score formulation) Bayesian Posterior Median Estimate of *Policy Competence* latent trait.
 - c. These variables were obtained from Krause and O’Connell (2016, 2019).
 - d. This data was obtained November 14, 2018.
43. **Senate Polarization Median**
- a. *senpolarizationmedian*
 - b. This measure corresponds to the absolute difference between the median members of each party in the Senate.
 - c. This data was obtained from Jeff Lewis’ website (<https://voteview.com/>).
